THE APP EXPERIENCE

Software workflow plan - with human review before campaign launch

1. Upload your products

Register your business, website and WhatsApp; upload product photos.

2. Prepare the ad drafts

AI-assisted copy and audience suggestions, based on product details.

3. Review and approve

The shop checks the products, offer, message and advertising budget.

4. Launch the campaign

Campaigns run on Facebook and Instagram after review and setup.

5. Receive WhatsApp inquiries

Interested buyers tap the ad and send a message to the shop.

6. Track the campaign

View ad spend, impressions, clicks and attributed conversations.

THE SHOP HANDLES THE SALE

Answer product questions. Confirm stock and price. Take payment.

Pack and deliver the order. Report sales separately from ad metrics.

SETUP & TARGETING

The shop authorizes its Page and WhatsApp connection. Campaigns use agreed locations and available audience settings, with product-specific copy. Audience suggestions do not identify every buyer or guarantee exact matching.

Build status: registration, private photo upload and leaflet are available. AI, payments and Meta publishing integration are the next implementation stage.

WHAT HAPPENS WHEN A BUYER TAPS?

WhatsApp opens with the shop as the destination.

The buyer sends a product inquiry, such as:

"Hi, I saw your ad. What sizes are available and what is the price?"

Each product ad uses the shop's approved photos and WhatsApp destination.

Use a genuine offer and confirmed stock when launching a shop's campaign.
